

AWIPS D2D Keyboard Accelerators

Keyboard accelerators are available for several functions. The list includes:

Menu Functions		Display Functions	
Key	Function	Key	Function
Ctrl+n	new procedure	left arrow	step back
Ctrl+o	open procedure	right arrow	step forward
Ctrl+d	delete procedure	Ctrl+left	first frame
Ctrl+h	history	Ctrl+right	last frame
Ctrl+p	print w/options	up arrow	loop faster (turn on if not)
alt-F4	exit/ close dialog	down arrow	loop slower (turn on)
Ctrl+c	clear	Keypad 0	toggle image
Ctrl+l	loop properties	Keypad 1-9	toggle overlays 1-9
Ctrl+i	image properties	shift-Keypad 0-9	toggle overlays 10-19
F12	where's that cursor? (the "Martha" button)	Keypad .	image 1/2 toggle
Insert	toggle image combo	Keypad +/-	image fade
Ctrl+b	copy out current bundle	Keypad Enter	3-way legends toggle: 1. standard 2. time only 3. maps
Ctrl+s	enable data scaling		
Ctrl+t	time options		

Note: In order for these accelerators to be used, the display window (or any properties dialog) must have focus. That is, its border must be colored. Tear-away menus are *not* included; you can use the arrow keys in those to navigate through the menus - the right arrow opens cascades. If your pointer is over an application menu (e.g., the Volume Browser), you also can't use the keyboard accelerators. (This same point applies to the text window that you can use on the graphics screen; you can't type commands there unless it has the colored border indicating focus.)
